You are accessing a U.S. Government (USG) Information System (IS) that is provided for USG-authorized use only.
By using this IS (which includes any device attached to this IS), you consent to the following conditions:
- The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, COMSEC monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.
- At any time, the USG may inspect and seize data stored on this IS.
- Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.
- This IS includes security measures (e.g., authentication and access controls) to protect USG interests--not for your personal benefit or privacy.
- Notwithstanding the above, using this IS does not constitute consent to PM, LE or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants. Such communications and work product are private and confidential. See User Agreement for details.

Establish Login & Password
System Requirements
To begin registration, type a Login ID and Password. You will enter these each time you access the site. Your Login ID should consist of at least four letters and/or numbers. Your password is case-sensitive and MUST contain all of the following:
Upper-case
Lower-case
Special character
(excluding _-+= or quote of any type)
Number
Login ID:
Password:
Confirm Password:
Submit
Privacy & Security Notice
Now you need to create a User Name and Password. Create a name you will remember and the same with the password. Although they say you shouldn't, I recommend writing it down and storing it in a place you will remember. An example of an acceptable password to meet the above requirements would be "IMNerd!!01" Click "Submit" when done.

IMPORTANT – Be sure to download/print this PDF document now. It tells you how to get credit for the Hazmat Awareness training when you are finished completing the downloaded course!!!!!! Close when done.

DoD Hazardous Materials Awareness Training and Certification Course (2008 Edition - Downloadable Version)

General Information: While the Air Force resolves the technical problems and connectivity issues associated with the Online Learning Management System (LMS), we have created a downloadable version of the accredited DoD HazMat Awareness certification course to help our students complete their mission-critical training and certification requirements. The new downloadable course eliminates the problems and frustration our DoD students are currently experiencing trying to complete their mandatory training requirements. This course complies with federal law (OSHA 29 CFR 1910.120) and satisfies the HazMat Awareness training and certification requirement spelled out in Chapter 6 of AFI 10-2501; *Air Force Emergency Management (EM) Program Planning and Operations.*

Important Information: It is extremely important that you print, read and follow the procedures explained in this document. To help you fully understand some of the features, benefits and courseware limitations associated with the downloadable version of the course, we have included screen captures and explanatory information below. We have completely tested this course on several different computer platforms and it works great. We are confident that you will find the new downloadable version of the HazMat Awareness course to be a much more pleasurable learning experience.

developed in response to system difficulties with the ADLS/VLC systems. This
course is large at 80 MB, do NOT attempt to download unless connected using a LAN or broadband connection.
Downloading this course package does NOT constitute completion of the course. You will NOT receive credit within the ADLS/VLC system for completing this off-line course, your only proof of completion will be the student data which will be accessible once the entire course is completed. Ensure you follow instructions for forwarding student data for certification per the instructions provided under the requirements and instructions link.
Pay special attention to this
Select the "Take Course" button to begin the course described above, or click "Return to Course List" to go back to the online course listing.
NOTICE - If you have a pop-up blocker on, the course won't launch. Please allow pop-ups from this site to take your course.

Download and Installation Instructions for Courseware
1. Download this file to your harddrive by right-clicking it and choosing SAVE TARGET AS.
2. Once the file is finished downloading, go to the location where it was downloaded and unzip it.
Windows XP users, right-click on the file and choose EXTRACT ALL from the options.
The ZIP file includes the installation program, as well as the Requirements document (as an Acrobat Reader file).
3. Select Run from your Windows Start menu, and browse to Install_HazMat_Awareness.EXE. Click on it. You may need to have POWER USER or ADMINSITRATOR rights on the machine that you are loading this on.
4. Follow the instructions in the installation program.
Things are pretty self explanatory from this point. You need to download a large zipped file and then unzip it. Unzipped it will be the EXE file mentioned above to install the program on your computer. Earlier you where supposed to save a PDF file that explains how to get credit for this course once you pass the exam. See slide 19. Take this serious and pass the exam – you will simplify your time on HazMat to complete Awareness level training & testing before coming to the USACBRNS. If you fail, you will have to test again here at the USACBRNS.
